Experience

- More opportunity to interact with fun element.
- More involvement of villagers makes output more reliable.
- PRA tools enabled us to grasp village profile in depth.
- Helped us to understand the socio-economic and infrastructural aspect of the village.

Occupational pattern

- 80% villagers depends on agriculture.
- Other main occupations are beedi making, toddy taping, stone breaking, Labour work.

Agriculture

- we as a team have been given a wonderful opportunity to interact with villagers at the grass root level and learn the real problems of rural India.
- There is wonderful communal harmony which prevails in the village.
- Primary school has a English medium facility and the learning outcome has been satisfactory.
- We have learn about different cropping pattern and several agricultural practices.
- The Mee-seva facility in village is working very well.
- The overall key learning for us is that policy making should be done keeping in mind the villages at the grass root level rather than being done keeping in mind the power centres which are mainly urban areas.

ISSUE

- No employment generation
- Poor drainage system
- No grave yard
- Lack of infrastructure
- Poor implementation of government programmes
- No high school
- No irrigation water
- Drinking water with high fluoride content

Suggestion/Recommendations

- Systematic and planned garbage collection
- A Knowledge centre can be set up by the villagers with the help of village development committee.
- Efficient water management through storage tanks in the fields and soil health restoration through timely addition of manure and sand from the dried up lakes and other water bodies
- Pooling of waste lands for graveyard.

- Bus stand facility should be provided and the frequency of number of buses should be increased.
- A high school should be constructed.
- Lift irrigation facility should be provided from the Godavari river.
- Effective implementation of government scheme like MNREGA, IYA, NBA etc.

Thank You
