

Data Driven Decision MakingPutting People First

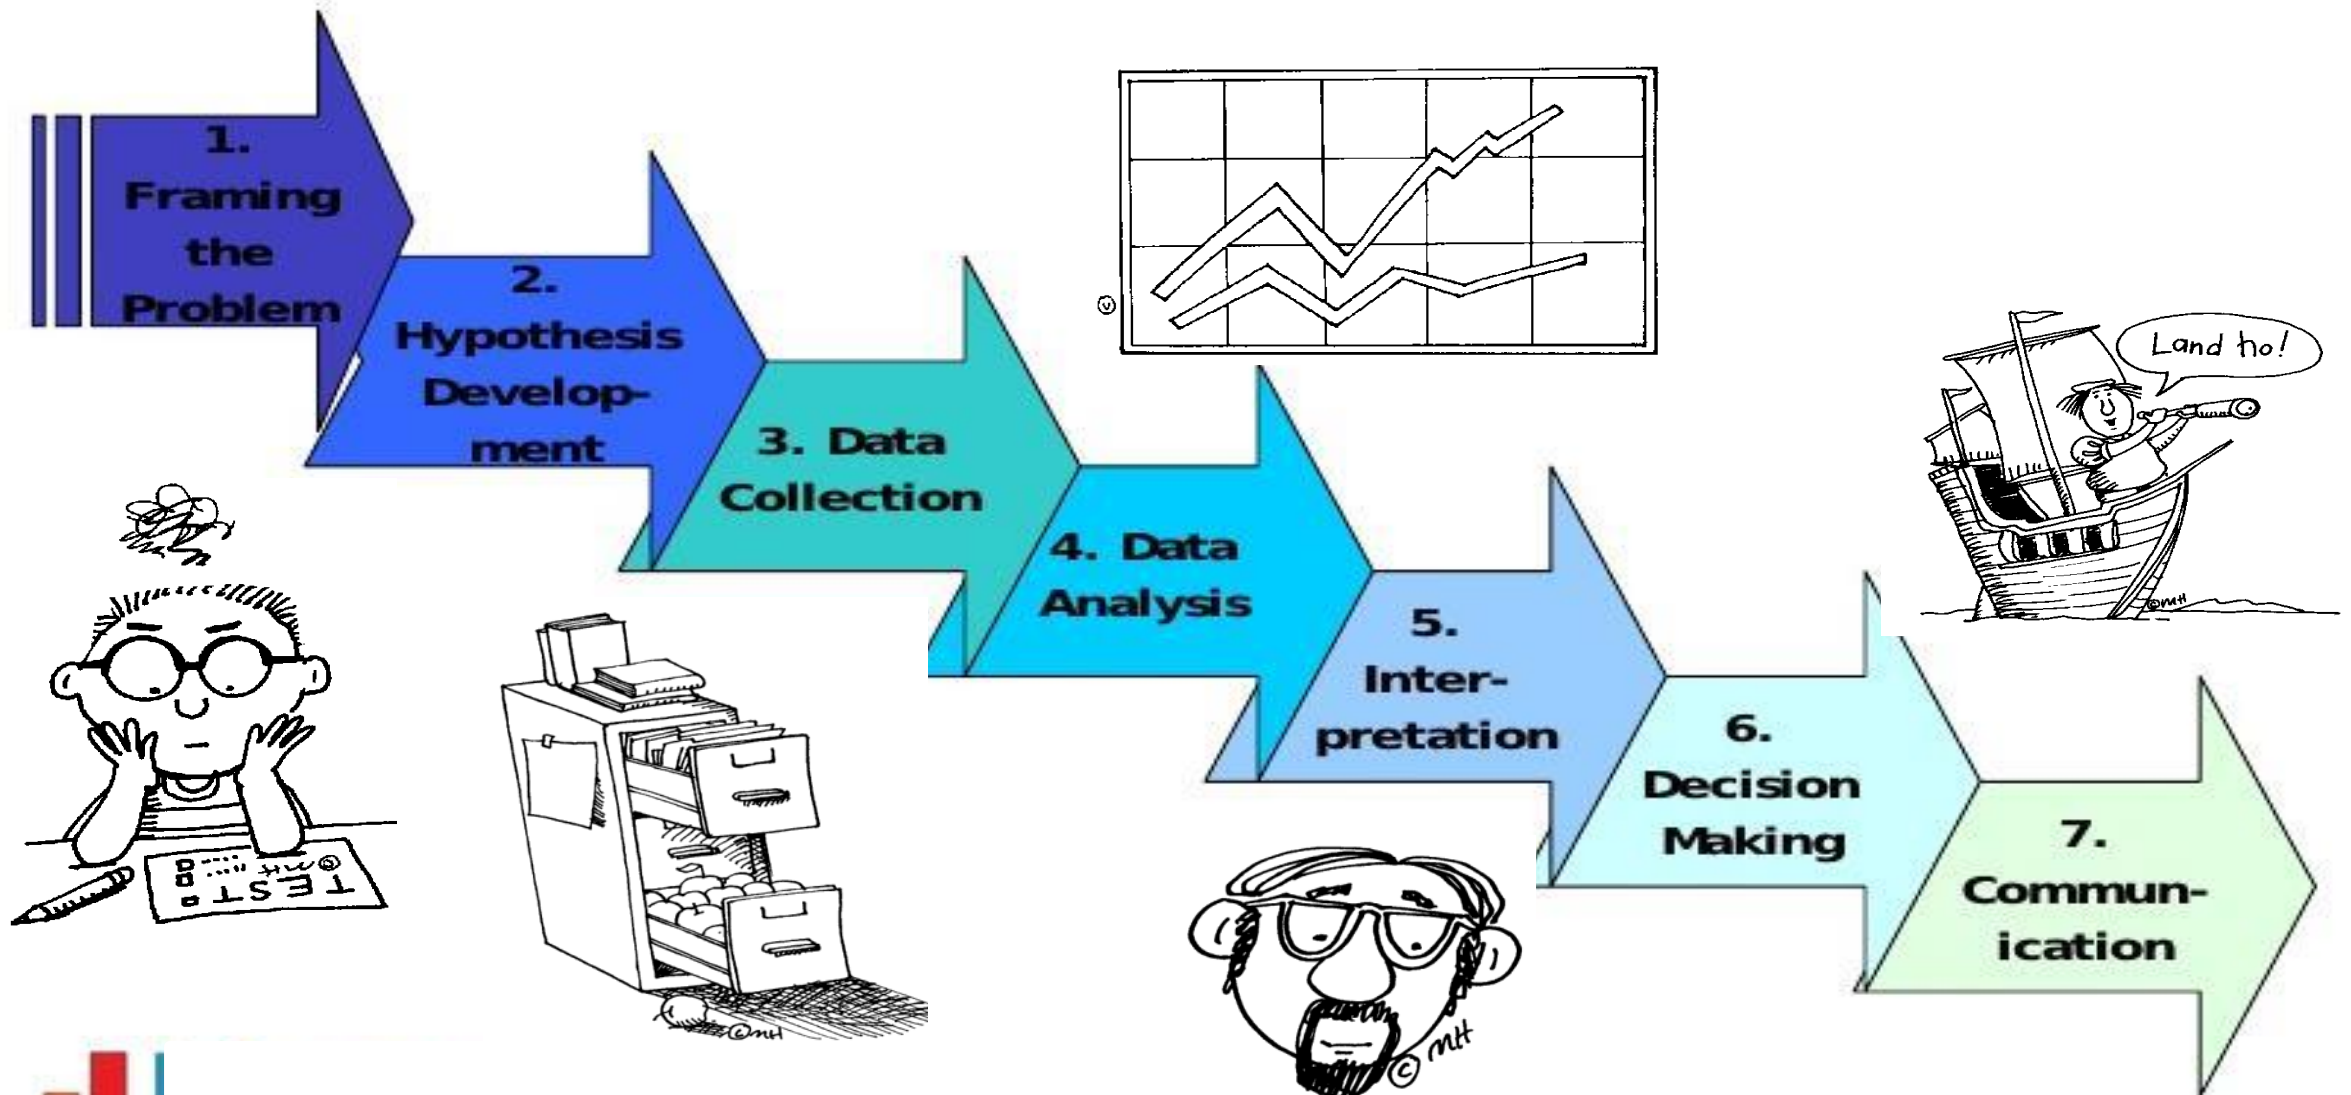

INITIATIVES IN TELANGANA STATE.....

Planning Department

Outline

- Importance of Data in decision making
- Glimpses of Initiatives in Telangnaa State – data driven decisions
 - State Profile
 - Activities of Department of Economic and Statistics
 - Samagra Kutumba Survey (Intensive Household Survey) – a goldmine of data
 - Mana Vooru – Mana Pranalika
 - Know Your District – Plan Your District
 - District Knowledge and Innovation Centres (DKICs)
 - In-depth Analysis of Literacy Rates – A Case Study

Steps involved in data-driven decision making

Data Quality

The necessity of official statistics has crossed all the limits
than ever before!

“What gets measured... Gets done...!”

It means regular **measurement** and reporting keeps you focused — because you use that information to make decisions to improve your results. Your most critical measurements are called Key Performance Indicators...!

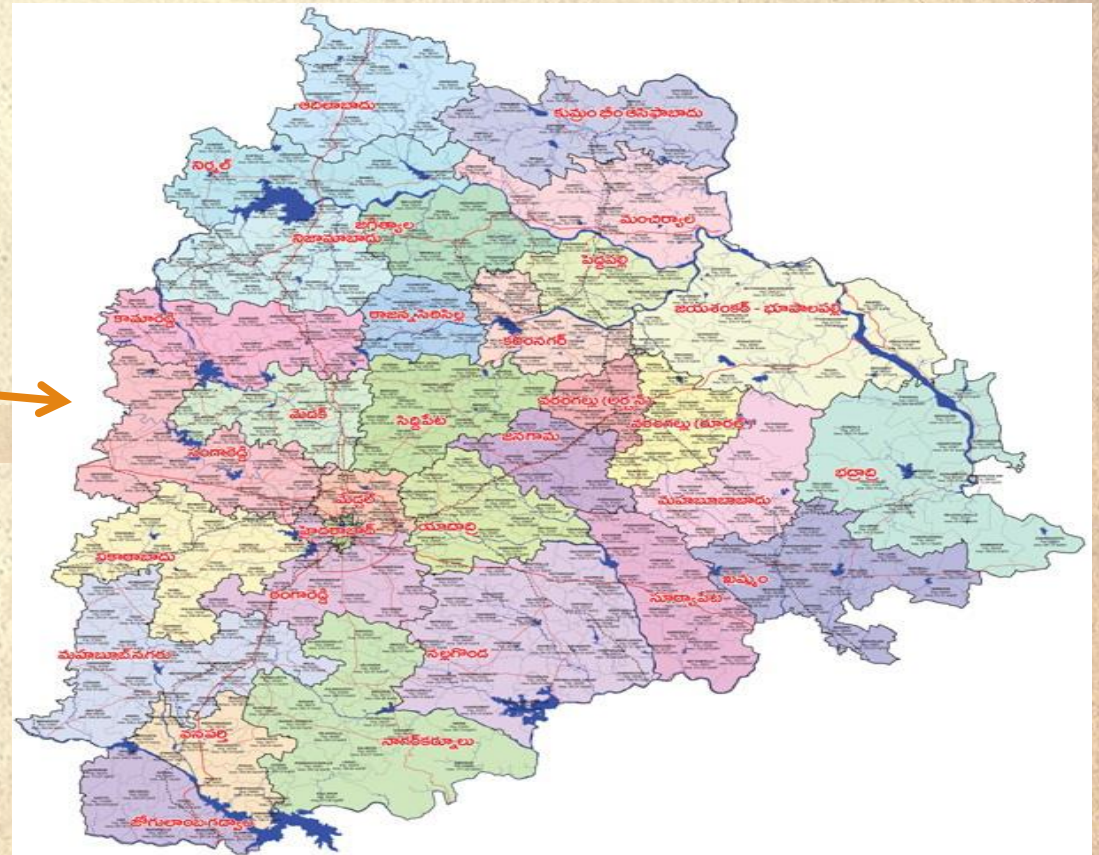

Telangana State Profile

Telangana State - The Vision

- Telangana, the youngest State in the Union of India envisages a comprehensive, inclusive and holistic development of its people. Towards achieving the vision of '***Bangaru Telangana (Golden Telangana)***', Government of Telangana has taken up initiatives such as...
 - ✓ **accelerating economic growth;**
 - ✓ **improving infrastructure facilities; and**
 - ✓ **programmes targeting social welfare and inclusive growth.**
 - Most of these initiatives, will pave the way for achieving the 'Sustainable Development Goals'.
- "I firmly believe that growth has no meaning, and even legitimacy, if the deprived sections of the society are left behind"**
- Sri K. Chandrashekar Rao, Hon'ble CM, Telangana**

- Telangana is the youngest among the 29 States in the Union of India – formed on June, 2nd 2014.
- 31 Districts – covering two major River Basins – Godavari and Krishna
- Abundant Natural Resources and Talent Pool
- The vision of the Government is to build a 'Golden Telangana' (*Bangaru Telangana*)

TELANGANA STATE

In order to bring administration closer to the public and to ensure that the benefits of development and welfare schemes reach the poorest person in the State more effectively and efficiently, existing 10 districts are re-organized into 31

State Profile in Brief

- 'Telangana' was born on 2nd June 2014 as the 29th State in India
- State has reorganized its districts from 10 to 31 w.e.f. From 11.10.2016
- State has an area of 1,12,077 Sq. Kms., and has a population of 3,50,03,674
- Proportion of children (0-18 years) to the total population is 35%
- Youth population (15-18 years) proportion is 8% of the total population
- Sex ratio of the state is 988 females per 1000 males
- Child sex ratio (0-6 years) of the state is 933 girls per 1000 boys
- State is arid and dry and is primarily dependent on rainfall for agriculture
- Telangana is predominantly an agrarian society with 61 percent of the people living in rural areas
- Average size of the land holding is 1.12 Hects

Key Characteristics

SL. No.	Item	Unit	State	All India
1	Geographical Area	Sq. Kms.	1,12,077	32,87,469
2	Districts	Nos.	31	716
3	Revenue Divisions	Nos.	68	-
4	Mandals/ Tahsils	Nos.	584	6,650
5	Revenue Villages	Nos.	10,434	6,40,930

Community Statistics

Literacy Rates

Activities of Directorate of Economics and Statistics (DES)

Government of Telangana

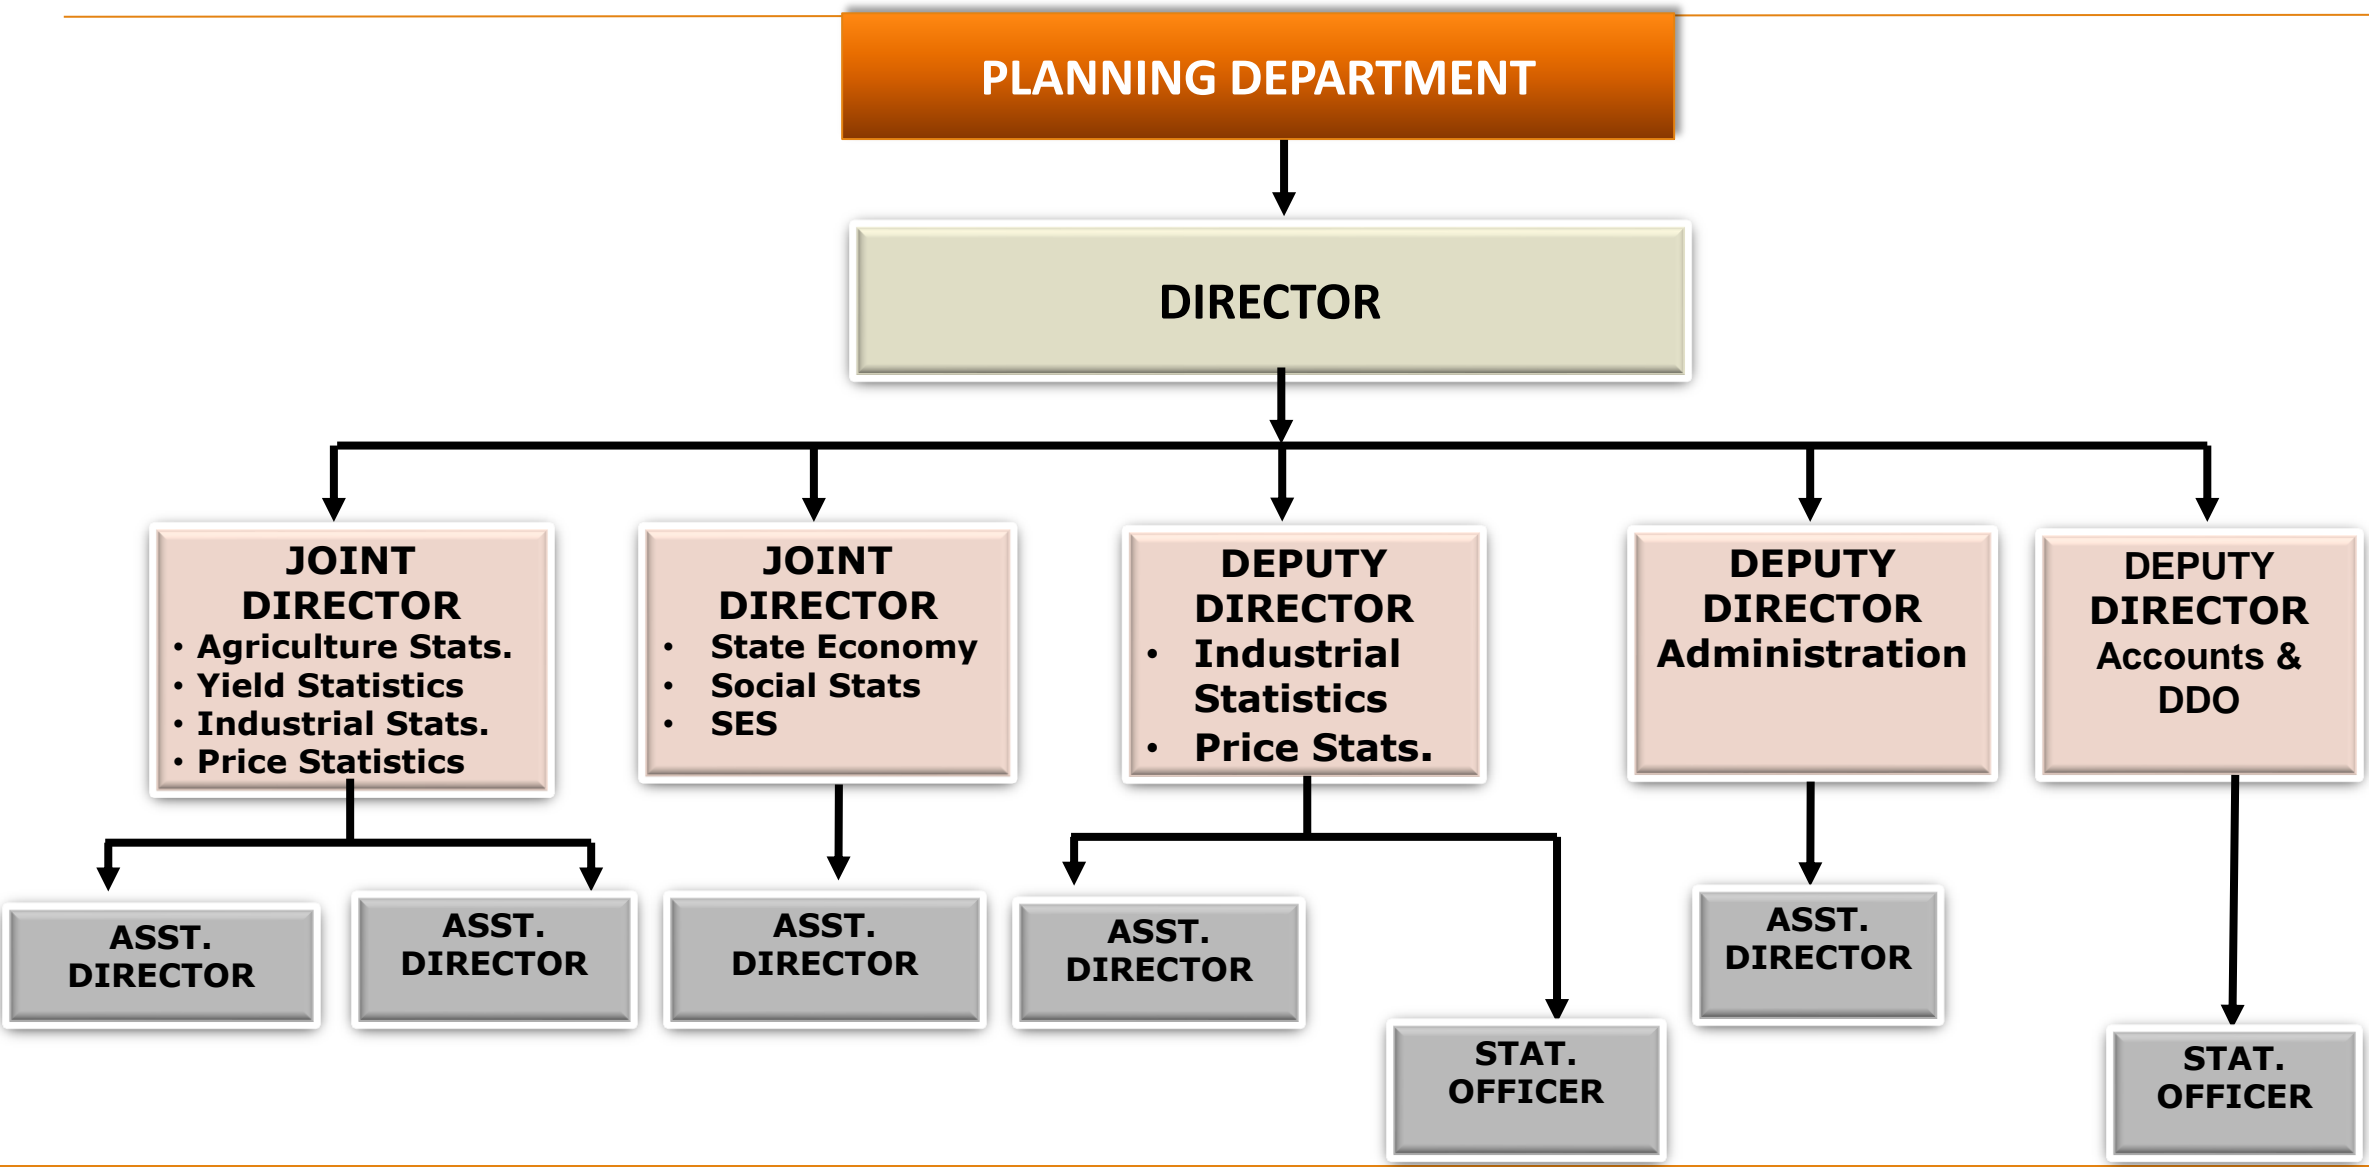

Brief Introduction

- The Bureau of Economics and Statistics was created as a centralized agency for the collection, compilation, analysis and dissemination of Statistics by a Firman of the NIZAM in 1919.
- It was reconstituted in 1956 and Re-designated as “Directorate of Economics and Statistics” (DES) in 1990.
- DES has district offices in all 31 Districts headed by the CPOs supported by Statistical personnel in all 68 Revenue Divisions and 584 mandals.
- At divisional level, one DySO supervises the work of MPSOs.
- At mandal level, the MPSO is the statistical functionary to collect, compile and transmit all statistical data.

Important Activities of DES

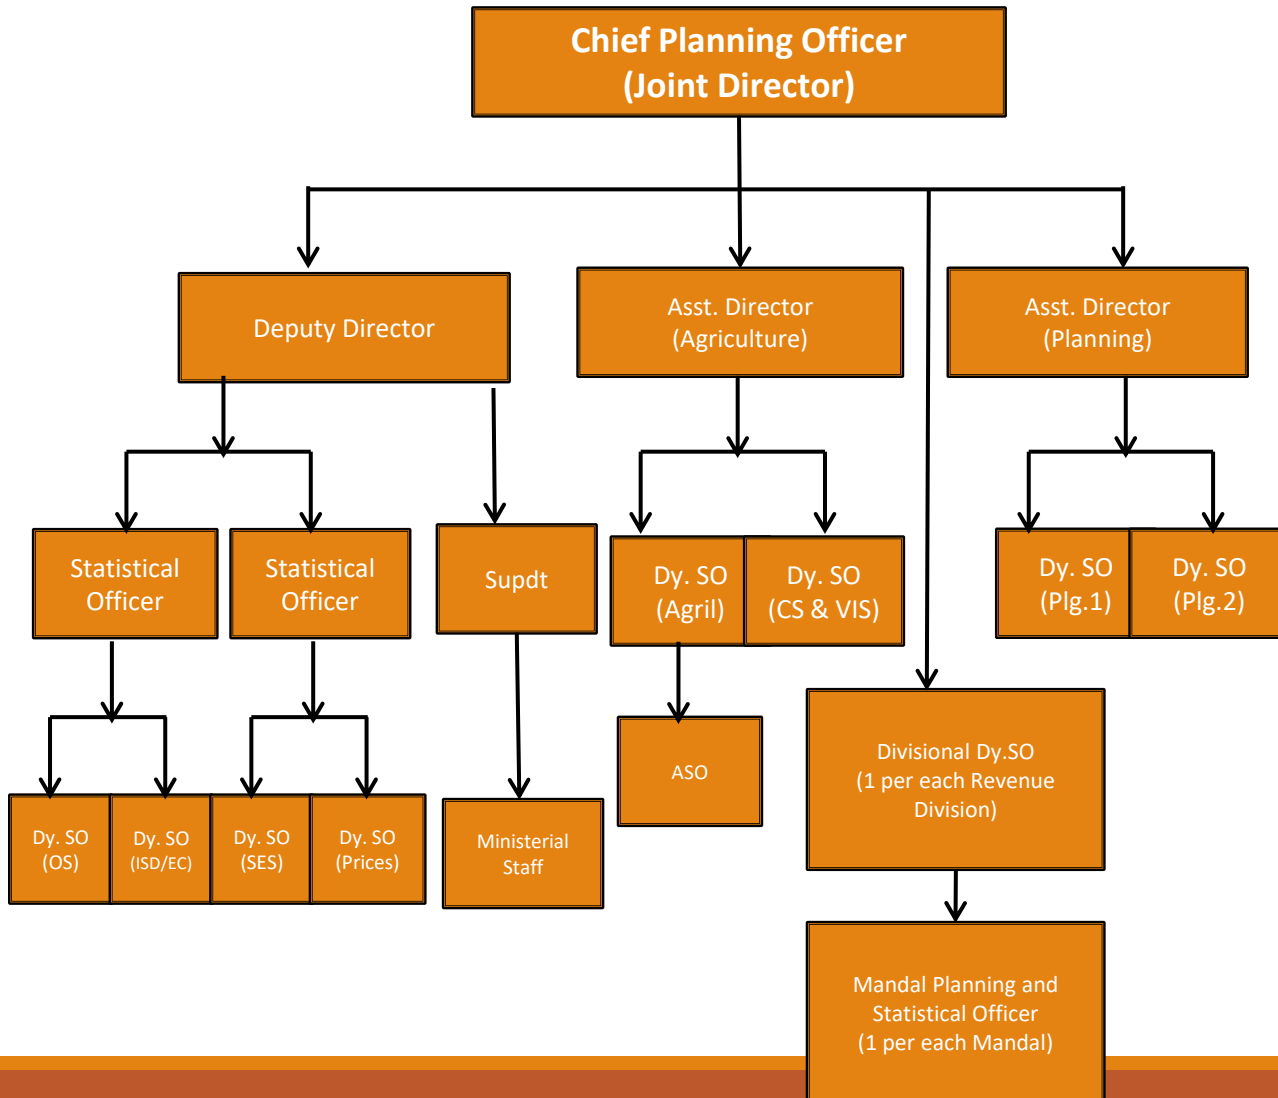

- Nodal Agency for all Statistical matters in the State
- **Agriculture Statistics** – Area Statistics
- **Yield Statistics** – Crop Estimation Survey
- **Industrial Statistics** – ASI, IIP and Business Register
- **Price Statistics** – Retail, Wholesale, Livestock, Building Materials, Farm Harvest Prices
- **Indices** - CPI(IW), CPI (RU&C), Cost of Construction, etc.
- **State Economy** - GSDP and DDP Estimates
- **Social Statistics** – Publications
- **Censuses**: Census of Land Holdings, Economic Census, Minor Irrigation Census, etc.
- **Surveys**: Annual Survey of Industries, Socio Economic Surveys, etc.

Organogram

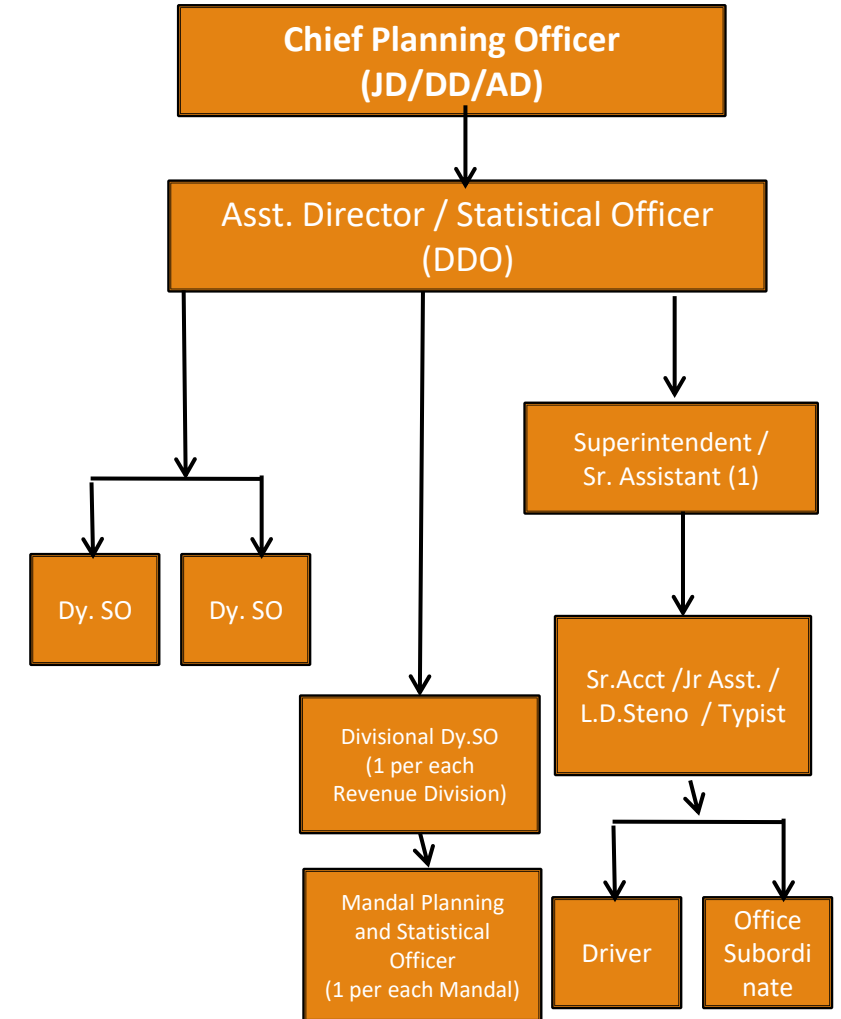

District Organization Structure

Before Re-organisation Structure

After Re-organisation Structure

Functions of Office of the Chief Planning Officer

- Chief Planning Officer coordinates all the Statistical and Planning activities at the district level.
- CPO is responsible for compilation of data at the district level duly conducting various Censuses/Surveys and all the works entrusted by the DES, through the MPSOs/DySOs.
- Monitors the work of MPSOs at Mandal level and DySOs at Divisional level.
- Assists the District Collector in implementation of MPLADS, CDP, SDF etc., and also monitor the progress of various developmental activities.

Role of Mandal Planning and Statistical Officers (MPSOs)

Collection of data on:

- Rainfall Statistics
- Agricultural Statistics
- Yield Statistics
- Price Statistics
- Village Level Statistics
- Local Bodies Accounts
- Industrial Statistics
- Business Register
- Conduct of Crop Cutting Experiments

Conduct of Censuses and Surveys:

- Census of Land Holdings
- Minor Irrigation Census
- Economic Census
- Socio Economic Surveys

Rainfall Statistics

The DES is being Rainfall Registering Authority collects and maintains rainfall data recorded in all the Rain-gauges in the state.

Present Status:

- i. DES has 459 manual rain gauges in all the erstwhile mandal headquarters
- ii. TSDPS has installed 851 AWS and 17 ARGs at 10 km X 10 km grid and obtain the data on hourly basis by using GSM technology.
- iii. AWS records 6 weather parameters viz., Rainfall, Wind Speed, Wind Direction, Atmospheric Pressure, Humidity, Temperature
- iv. IMD also installed 12 manual rain gauges, 11 AWSs and 54 ARGs
- v. As on the date, the State has a total rain gauge network of 1404 stations in the state (471 Manual, 862 AWSs and 71 ARGs

Integrated Rainfall Data

The Directorate initiated integrated rainfall data recorded at all Rain gauges and bring out single representative average figure from 1st June, 2017 onwards and make available Mandal wise on

- DES website : **“ecostat.telangana.gov.in”**
- TSDPS website : **“tsdps.telangana.gov.in”**

- Note:**
1. Integrated rainfall data will be the official data from 1st June 2017 and being utilized for all proposes .
 2. All Line Departments were provided with User ID & Password for downloading required data.
 3. The Mandal Level integrated Rainfall will provides homogeneous representation of Rainfall Estimates because of increase of no. of Rain gauges.
 4. Integration Rainfall evolve a uniform Scientific system to secure a dependable single representative figure at the Mandal level

Agriculture Statistics

- Agriculture census started in the year 1943-44 and is being conducted every year, in both Kharif and Rabi seasons.
- The objective of the Agricultural Census is to collect the data relating to area-sown under different crops, source-wise area irrigated under different crops and land use pattern.
- Directorate has developed a “web portal” for entry of village wise area sown particulars from Kharif 2016 onwards.
- Before taking up online data entry, all the District collectors are requested to reconcile the area sown particulars at the Mandal and District levels with the line departments concerned viz., Agriculture, Irrigation, Horticulture and Sugarcane so as to arrive at a unique figure.
- A publication entitled “Agricultural Statistics at a Glance” is being compiled based on this data and published every year.

Advance Estimates

- Crop-wise area sown particulars are available only after conducting the Agricultural Census, every season.
- Without waiting for this data, the department is compiling and releasing Advance Estimates, Four times in a year, based on area sown, yield, and production particulars available as on the date of release.
- These advance estimates are being used for policy interventions by the State Government and also used in compilation of GSDP estimates.
- These estimates are also furnished to the Ministry of Agriculture and Farmers welfare, Department of Agriculture, GOI and State Civil Supplies Department for their use.

Crop Estimation Surveys

- The main objective of this survey is to estimate the average yield per hectare area of the selected crops, and there by the production. Under this survey, 11 food crops and 10 non-food crops are being covered.
- **Food Crops** : Paddy (Rice), Jowar, Bajra, Ragi, Maize, Korra, Red gram Green gram, Black gram, Horse gram and Bengal gram
- **Non Food Crops** : Groundnut, Sesamum, Castor, Sunflower, Soya bean, Cotton, Chilies, Sugarcane, Mesta and Tobacco.
- In addition, the following **Fruit and Vegetable crops** are also being covered
- **Fruit crops** : Mango, Cashew nut, Lemon, Batavia, Banana and Guava.
- **Vegetable crops** : Tomato, Onions, Brinjal and Bhendi

Crop Estimation Surveys

YIELD COLLECTED THROUGH CROP CUTTING EXPERIMENTS WILL BE USED FOR:

1. Estimation of Average Yield per Hectare
2. Estimation of Agriculture Production
3. Implementation of Crop Insurance Scheme
4. Assessment of prevailing drought conditions

SEASON WISE DETAILS OF EXPERIMENTS PLANNED :

Sl. No.	CCEs Planned	Kharif	Rabi	Total
1	General	4150	2386	6536
	PMFBY			
2	VIS	22208	13762	35970
3	MIS	4596	2950	7546
4	Fruits	1334	---	1334
5	vegetables	890	520	1410
Total		33178	19618	52806

Use of Smart Technology in conduct of CC Experiments

- Tablet PC with internet facility has been provided to all the MPSOs for capturing the CC Experiment results along with the Photographs together with longitudes and latitudes and transferring the data directly to the Ministry of Agriculture (GoI) using the Agri. App.
- Electronic Weighing Machines with USB interface also provided to all the MPSOs to capture accurate weight of yield and transmitting the same to the Tablet PCs for uploading to Website.

Objectives:

- To cover the loss due to natural calamities.
- To motivate farmers to continue farming.
- To make the farmers to adopt the modern and innovative technologies.
- To ensure flow of credit to the farmers

Coverage:

- Compulsory to All Loanee farmers
- Voluntary to Non-Loanee farmers
- Maximum Coverage to SC, ST and Women farmers.

Coverage of Crops

Village made as Insurance Unit (VIS):

- Village Insurance Scheme is being implemented in the state covering major crops viz., Paddy, Maize and Soya bean, etc.
- **Mandal made as Insurance Unit:**
- Other than the crops covered under VIS, those crops are covered under Mandal made as Insurance Unit with a minimum area of 1000 hectares under each crop.
- **Weather Based Insurance Scheme:**
- **Unified Insurance Scheme:**

Census of Land Holdings

- The objective of the Census is to describe structure and characteristics, such as land utilization, irrigation and un-irrigated area under different crops, livestock, use of agriculture machinery and implements, use of fertilizers, seeds, agricultural credit, etc. The present Agricultural Census is conducted with 2015-16 as reference year.

It consists of 3 phases:

- 1st phase (Main Census) i.e., Size class wise, social group wise and gender wise number and area of operational holdings are collected from all the villages.
- 2nd Phase (H. Schedules) i.e., the data on Tenancy, Land use pattern and Source wise area irrigated are collected from 20% of the villages.
- 3rd phase (Input Survey) i.e., the information on the application of Inputs like Fertilizers, Pesticides, type of seeds used etc., are collected from 7% of the villages.

The data is compiled based on the village records

Minor Irrigation Census

- The Govt. of India had launched Scheme called “**Rationalization of Minor Irrigation Statistics (RMIS)**” in 1987.
- The Major activity under the Scheme is to conduct Minor Irrigation Census on Quinquennial basis covering all ground water and surface water sources used for irrigation purpose.
- This is 5th Census in the series with 2013-14 as reference year
- This census is conducted to get Comprehensive and Reliable database on Minor irrigation sources , such as:
 - a. No. of sources existing up to the year 2013-14.
 - b. Source wise Irrigation potential Created and Utilized.
 - c. Usage of water and energy conserving devises like “Sprinklers & Drip Irrigation systems” and also Non-Conventional energy devises “Solar Pumps and Wind Mills.”

Minor Irrigation Census

Type of Source	No. of Sources		
	3rd MIC 2000 - 01	4th MIC 2006 - 07	5th MIC 2013 - 14
Dug Wells	7,35,273	6,30,297	5,00,173
Shallow Tube Wells (< 35 Meters)	4,23,618	5,95,495	6,80,224
Deep Tube Wells (>35 Meters)	4,469	57,138	2,69,575
Surface Flow Irrigation	38,151	36,066	36,144
Surface Lift Irrigation	15,199	13,875	29,743
Total	12,16,710	13,32,871	15,15,859

Price Statistics

Objectives:

Price is termed as an economic 'Barometer' of real purchasing power of the community. The price stability is considered by the Nations World over as a crucial pre-condition for sustained growth in economy. Variation in prices is measured in the form of Index Numbers.

The Directorate of Economics and Statistics has been collecting and compiling the following types of price statistics:

1. Retail prices of Essential Commodities.
2. Wholesale Prices of Agricultural Commodities
3. Prices of Building Material & Wage Rates of Construction Workers
4. Prices of Livestock and Livestock Products
5. Monthly Wages of Agricultural Labour
6. Farm Harvest Prices of Agricultural Commodities (Kharif & Rabi Seasons)
7. Price Indices like:
 - a. Shifting of Base Year of CPI-IW from 2001 = 2015
 - b. Consumer Price Index for Rural, Urban and Combined.

Compilation of District level Consumer Price Index(Rural, Urban and Combined)

- In view of the new initiative of the CSO, GOI to bring out CPI (R,U&C), separately to each State and All India, w.e.f., January, 2011.
- The CSO's indices at the State level will be based on sufficiently adequate price quotations. However, the same no. of quotations are not sufficient to compute indices at district level
- In order to strengthen the compilation of DDP, the Directorate has decided to bring out CPI for all the Districts.
- **The state has become the first in the country to compile District level CPI**
- TAC in MOSPI has approved the methodology proposed by the DES and circulated the same among all the States to follow similar method in their States.

Consumer Price Index Numbers for Industrial Workers (CPI-IW)

Consumer Price Index is to measure changes over a period of time in the level of retail prices of a fixed basket of goods and services consumed by the Industrial Workers.

Centers for collection of prices:

Three centers are selected as a central series centers:

1. Hyderabad
2. Warangal
3. Godavarikhani

Three centers are selected as a State series centers:

1. Miryalaguda
2. Kothagudem
3. Nizamabad

Consumer Price Index Numbers for Industrial workers (CPI-IW)

Utility of the Index:

- Compilation of GSDP and GDDP under services sector.
- Regulation of Dearness Allowance for private and public sectors Industries as well as Central and State Government employees.
- Fixation and Revision of minimum wages under the Minimum Wages Act, 1948, in addition to fixing of VDA points.
- To this extent the Commissioner of Labour notifies the average Consumer Price Index Numbers on 1st April and 1st October, every year.
- Working out point-to-point Inflation Rates

Industrial Statistics

Annual Survey of Industries

- Annual Survey of Industries (ASI) provides Statistical information to assess the changes in growth and structure of organized manufacturing Sector.

Objectives:

- Systematic study of the structural aspects of the industry.
- To analyze the various factors influencing industries in the State
- Estimating the contribution of manufacturing industries as a whole and each type of industry to the "State Income".
- The estimates at district level with respect of industrial development in state i.e. , share of Fixed Capital, Invested Capital, Employment, Gross Value of Output and Gross Fixed Capital Formation.

Uses:

- Used in compilation of GSDP and DDP.
- A publication is brought out every year on this subject.

Index of Industrial Production (IIP)

Introduction:

- In order to capture the changes in the structure and composition of the Industry, over time due to the technological changes, economic reforms and consumption patterns of the people, the base revision exercise of IIP is undertaken in the State.
- The base year has been shifted from 2004-05 to 2011-12 on par with the CSO, MOSPI.
- IIP is compiled on Monthly basis.

Index of Industrial Production...

Usage of IIP

- IIP is used extensively by Government Departments, Industrial Associations, Research Institutes, Academicians, etc., for research and policy formulation.
- To compare the industrial performance of an economy in two different periods.
- To compare the performance and growth of State in the industrial sector over a period of time.
- Used in compilation of GSDP under Manufacturing and Electricity Sectors.

Socio Economic Surveys

- National Sample Surveys are being conducted by the National Sample Survey Office, every year with a select subject.
- DES has been participating in the these Surveys since 1958 (NSS 14th Round).
- The state is conducting the survey by doubling sample size and pooling the central and state sample data, the results are being compiled and released.
- The results are being utilized in compilation of GSDP and GDDP, apart from other purposes.

NSS 75th Round with subjects:

1. Household consumer expenditure
 2. Household social consumption expenditure on Health
 3. Household social consumption expenditure on Education
- At present the field work of the survey is under progress.

State Income Estimates

- DES compiles **Gross State Domestic Product (GSDP)** estimates at current and constant prices under the guidance of CSO and reconciles these estimates, periodically with the GOI.
- These estimates show the trends of the State Economy, contribution of different sectors, **structural changes** in the Economy so that the Government can take up appropriate policy initiatives and encourage investments in the selected sectors.
- The **Per Capita Income (PCI)** indicates the standard of living of the people in the State, which can be compared with the other States.
- GSDP estimates are used for borrowings by the state as per FRBM Act.

Revision of GSDP Estimates at various points of time

- **Advance Estimates (AE):** Advance estimates are compiled based on second advance estimates of Agricultural production, Livestock and its products, Mining, Fishing, Forestry and Index Industrial Production (IIP) and analysis of Budget Estimates of Government Expenditure.
- **First Revised Estimates (FRE):** The First Revised estimates are prepared using the data available from the production sectors such as Agriculture and allied sectors, Mining, etc. Secondary and Tertiary sectors GVA is compiled using the previous year trends, and estimates are prepared based on the available data sets.

Revision of GSDP Estimates at various points of time

- Second Revised Estimates (SRE): The Second Revised Estimates will be compiled by using the Agriculture Production data sets available for estimation and for other sectors about 70 percent of the data will be received and estimations are compiled based on the available data sets.
- The latest input rates & ratios, GVA of central part and Secondary and Tertiary sectors GVA will be compiled based on the previous year growth rates or trends.
- Third Revised Estimates (TRE): The Third Revised Estimates are prepared based on 100% data, both at current and constant prices. These estimates will be reconciled with Central Statistics Office, New Delhi. Third revised estimates are also called as final estimates. These estimates are also be revised if Central Statistics Office revises their GDP estimates

GSDP Estimates

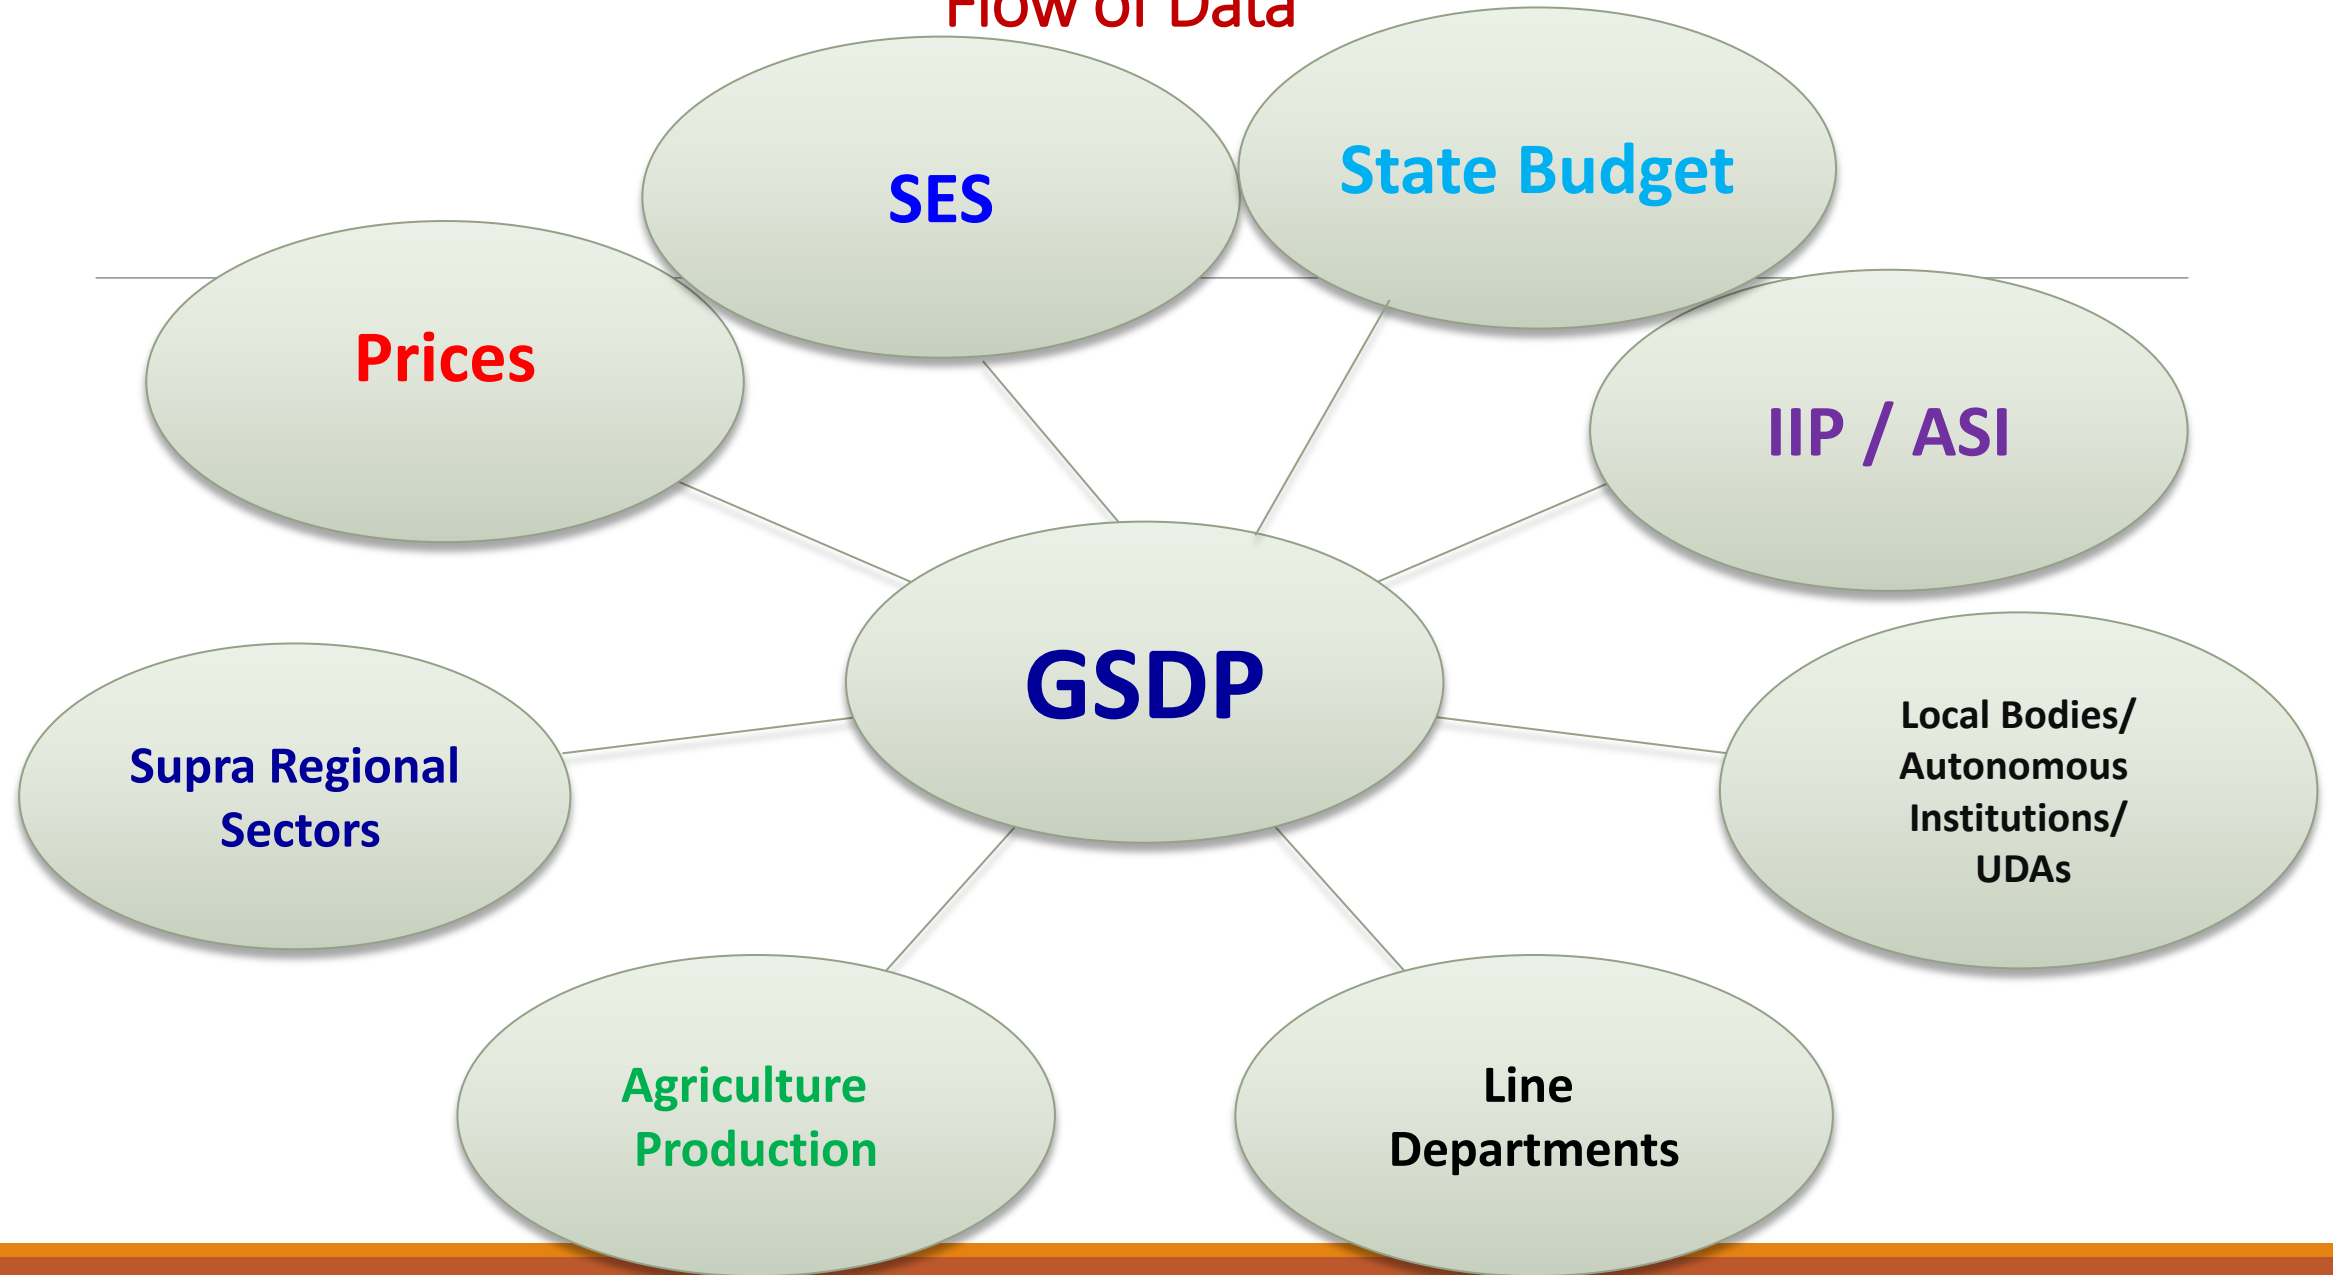

These estimates will be released in February, every year:

Sl. No.	Estimate	2016-17	2017-18	2018-19	2019-20
1	GSDP	2016-17 (AE)			
2		2017-18 (AE)	2016-17 (FRE)		
3		2018-19 (AE)	2017-18 (FRE)	2016-17 (SRE)	
4		2019-20 (AE)	2018-19 (FRE)	2017-18 (SRE)	2016-17 (TRE)

Approaches used in compilation of GSDP estimates

Sl. No.	Name of the Sector	Approach
Primary Sector		
1	Crops	Production
2	Livestock	Production
3	Forestry and Logging	Production
4	Fishing and Aquaculture	Production
5	Mining and Quarrying	Production
Secondary Sector		
6	Manufacturing Registered	Production
	Manufacturing Un-Registered	Income
7	Electricity, Gas, Water Supply and Other Utility Services	Income
8	Construction	Expenditure
Tertiary Sector		
9	Trade & Repair services, Hotels & Restaurants	Income
10	Transport by Means other than Railways and Storage	Income
11	Supra Regional Sectors (Railways, Communications and Financial Services)	Income
12	Real Estate, Ownership of Dwellings and Professional Services	Income
13	Public Administration and Defense	Income
14	Other Services	Income

Flow of Data

Primary Sector

Data Source:

- Crops Sector
 - DES (Agriculture) and Horticulture Departments.
- Livestock Sector
 - Animal Husbandry and Sericulture Depts.
- Forestry
 - Forest Department and Forest Survey Results
- Fishing
 - Fisheries Department
- Mining & Quarrying
 - Mines and Geology Department, CSO, and IBM, Nagpur.
- DES collects the data on production and Prices for Agriculture Crops and Horticulture Department Provided production of Horticulture Crops .
- For Horticulture crops, except Onion, Potato, Sweet Potato, Banana and Tapioca, production are supplied by Horticulture Department and DES Provides prices.

Secondary Sector

- This sector was titled as Industry Sector in 2004-05.
- In 2011-12 series, Mining and Quarrying sector has been shifted to the Primary sector, (earlier known as Agriculture sector) and renamed as Secondary sector.
- This Secondary sector consisting of Manufacturing; Electricity, Gas, Water Supply and Other Utility Services; and Construction sectors.

Data Sources:

- Manufacturing - Provided by CSO and DES, IIP.
- Electricity, Gas, Water Supply & Other Utility Services - State Budget and NDCUs.
- Construction - AIDIS, NDCUs, Households etc.

Until the datasets are provided by the CSO, appropriate growth rates based on economy trends is applied.

Tertiary Sector

Data Source

- Trade, Hotels & Restaurants: State NDCU's, Budget & CSO
 - Transport and Storage: Transport dept., TSRTC, NSS datasets Supra Regional Sector
 - Communication
 - Railways
 - Financial Services
- Data provided by CSO
- Real Estate, Ownership of
 - Dwellings and Business Services - NSS datasets & CSO
 - Public Administration - Budget, NDCUs and CSO
 - Other Services - State Budget , NSS datasets & CSO
 - Until the datasets are provided by the CSO, appropriate growth rates based on economy trends are applied.

Comparison of Growth Rates of Telangana *vis-a-vis* All India at Current Prices

Year	Telangana		All India	
	GSDP (Rs. crore)	Growth rate	GDP (Rs. crore)	Growth rate
2011-12	3,59,434	--	87,36,329	--
2012-13	4,01,594	11.7	99,44,013	13.8

Official Statistics

The following publications are being released annually for the use of Administrators, Government Agencies, General Public:

- Statistical year Book
- Telangana State at a Glance
- Compendium of Environment Statistics
- Women and Men
- Child Statistics

STATISTICAL YEAR BOOK 2017

**DIRECTORATE OF
ECONOMICS AND STATISTICS**

TELANGANA STATE AT A GLANCE 2017

**DIRECTORATE OF ECONOMICS AND STATISTICS
GOVERNMENT OF TELANGANA
HYDERABAD**

Socio Economic Surveys

Objectives of household consumer expenditure survey (CES):

To derive MPCE (Monthly per capita consumer expenditure) and the pattern of consumption

To ascertain living standards People and their purchasing power

These results are used in calculation of consumer price indices

Food consumption data used to study the level of nutrition of different regions .

Uses of household Social Consumption : Education

To know the qualitative and quantitative aspects related to educational attainment. (literacy rate education level obtained, type of institution, current enrollment etc.).

To build indicators on participation of the persons in the education system

Expenditure incurred on education.

To know the reasons for currently not attending education.

Uses of household Social Consumption : Health

- To generate basic quantitative information on the health sector

- To know the prevalence rate of Morbidity

- To know the extent use of health services provided by government.

- Expenditure incurred on treatment received from public and private sectors

- To know the population affected by communicable diseases

- Use of Alternative medical facilities Ex: (AYUSH)

- Status of immunization of children age 0 to 5 years.

- Percentage of Institutional child births.

Samagra Kutumba Survey (Intensive HH Survey)

Samagra Kutumba Survey – Intensive HH Survey (IHS)

CONCEPT

- Enumeration of Socio Economic status of all the Households in Telangana State formed on 02.06.2014.
- Survey conducted on one single day (19.08.2014) to ensure objectivity and prevent duplication.
- Entire Government machinery at the field level was deployed.
- Simple but effective format for survey.
- Compared to other surveys taken up so far, unique and most comprehensive exercise.

Objective

- To create a reliable database on each household of Telangana
- To facilitate usage by different Government Depts /agencies to implement programmes.
- Effective targetting of the Welfare Programmes.
- To ensure that the intended benefits reach the deserving poor.
- To plug the leakages in the implementation of programmes.

Every paisa must reach the deserving poor

Process

- Nearly 4 lakh government employees including police utilized to collect details of the households
- Information collected on voluntary basis to avoid litigation (WPs pending on privacy issues)
- Not notified under the Collection of Statistics Act, 2008 (mandatory disclosure)
- Collected the actual information on 8 broad areas covering 94 items
- Natives of Telangana, residing in other states and abroad who were physically not present included in the list, based on relevant documents produced.
- Training imparted to all the enumerators and supervisors for the effective conduct of Intensive Household Survey.
- Wide publicity given for participating of the people in the survey.
- Verification of documents issued by the State / Central governments such as:
 - Aadhaar card/Ration card, Bank Account Details, LPG connection booklet, Physically Handicapped certificate (if applicable), Electricity Bill, Pattedar Passbook, Caste certificate, Vehicle Registration details

Achievements

- Survey was conducted on a single day i.e., on 19.08.2014 throughout State.
- Entire Government machinery i.e., 3,85,892 employees were involved.
- Simple but effective format was used
- All the enumerators were effectively trained before the survey
- Compared to other surveys taken up so far, unique and most comprehensive exercise.
- About 1.05 crore survey formats were printed centrally

Immediate Benefits of the Survey

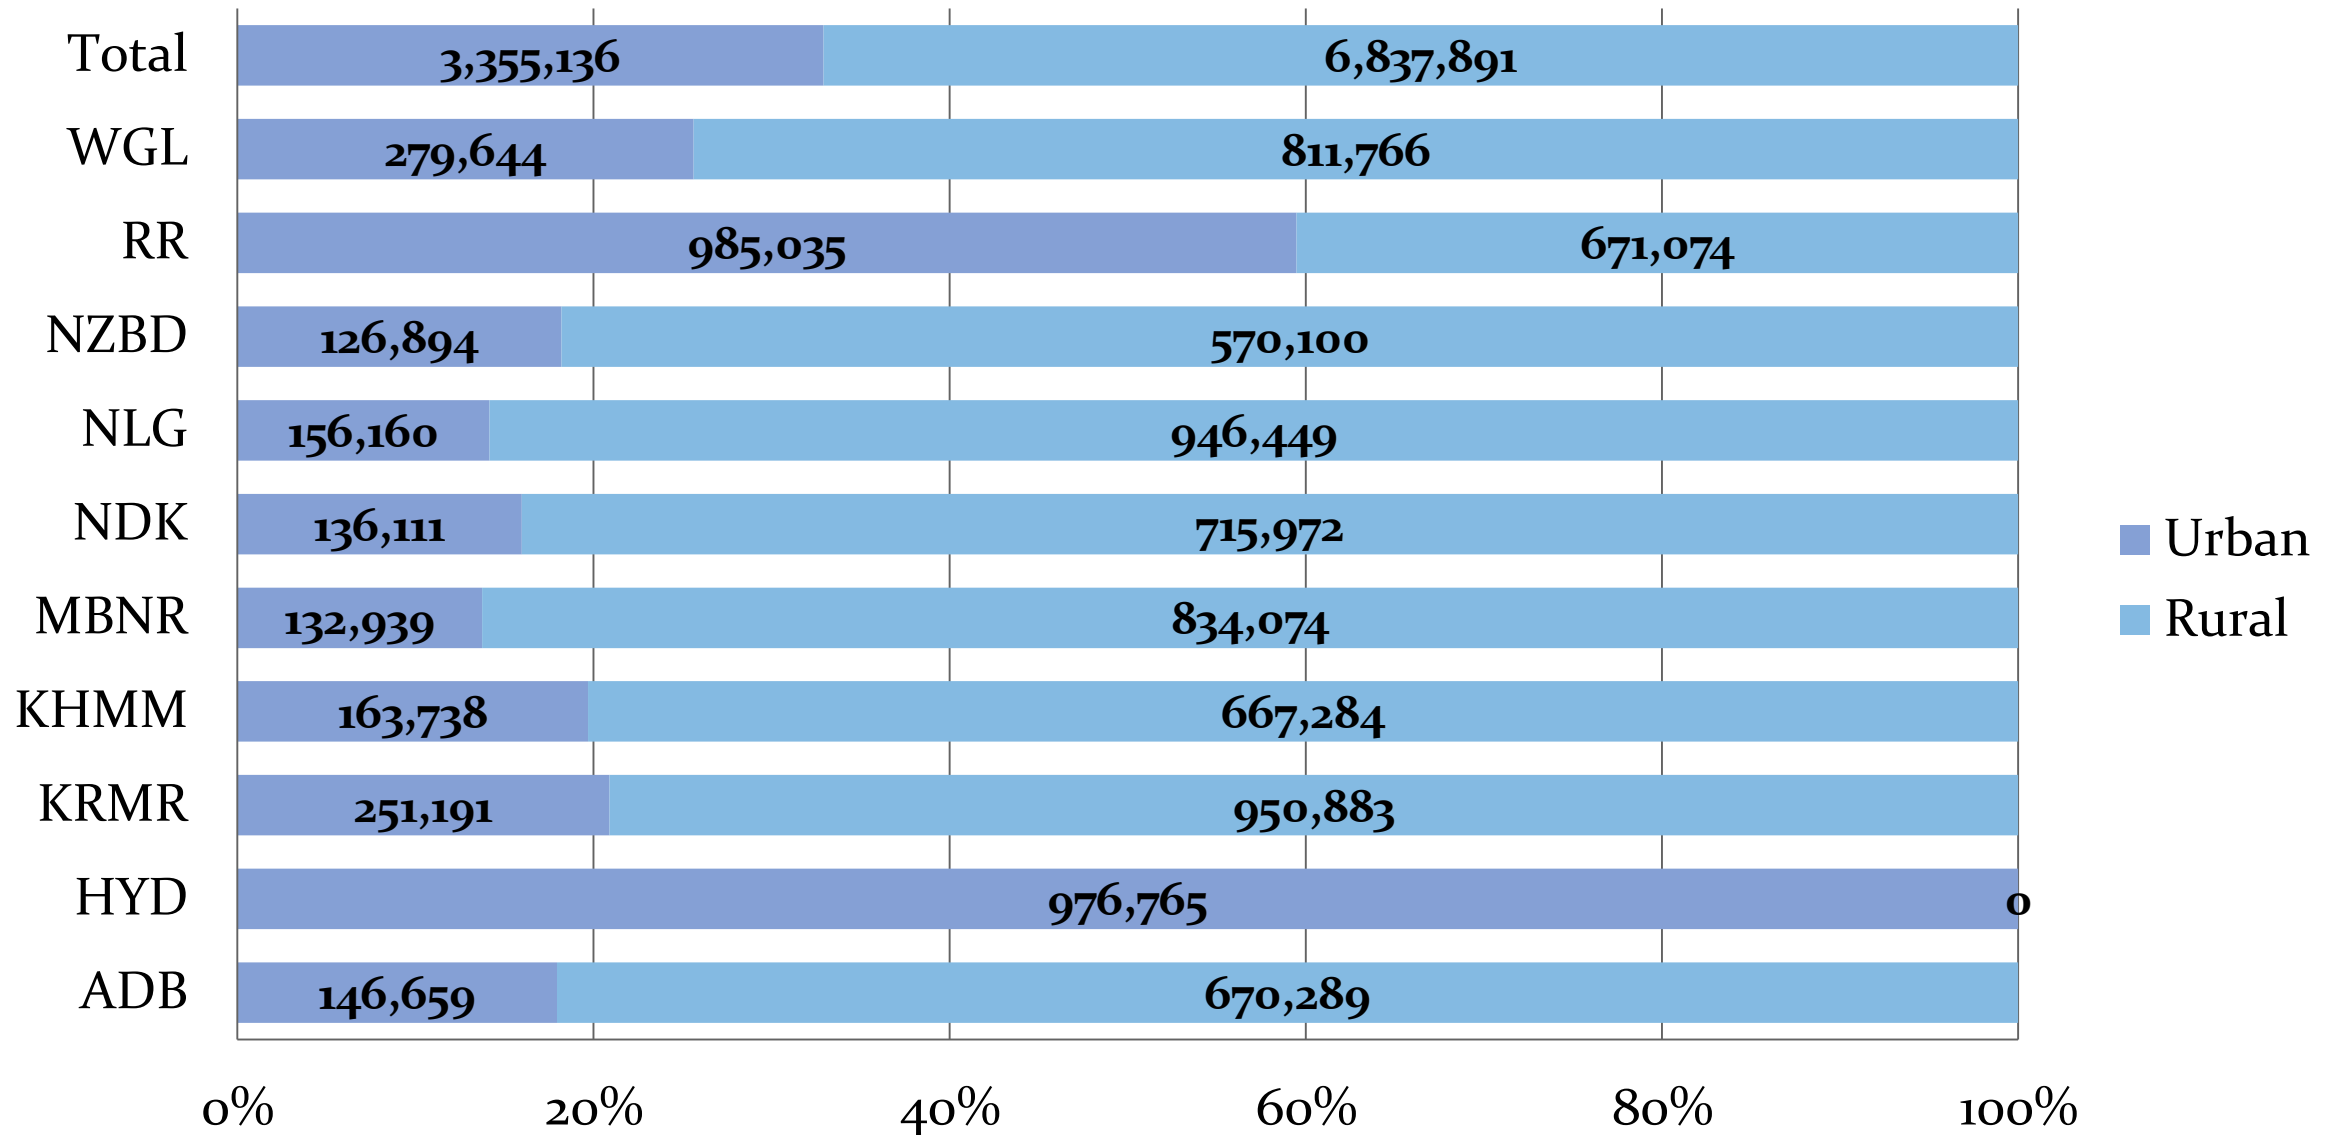

Use to identify eligible beneficiaries for welfare programmes, such as:

- Food Security Cards
- Aasara Pensions
- Financial assistance to Beedi workers
- Scholarships
- Selection of beneficiaries for 2BHK Housing
- Individual Sanitary Latrines
- Database used by ST and BC Commissions of State
- Integrated People Information Hub IPIH - Citizen 360
- Database for district reorganization exercise
- Assess impact of demonetization by using bank/PO account details

Mana Vooru – Mana Pranalika

Background

- Top down planning process did not effectively address the felt needs of the people
- People's Participation remained a distant dream
- Budgets for Districts and Sub-district units decided at the State level
- Need for 'Bottom Up' approach
- Shift from Bureaucratic to Democratic model
- Democratic Decentralization now translates to Economic Planning at Grassroots with people's participation
- The MVMP program aimed to prepared plans at Gram Panchayat, Mandal and District with People's participation and to incorporate them in State Plan for implementation
- Felt needs prioritized by the local bodies
- Resource mapping and allocation
- Institutional framework and support system

Process

- Identification and Prioritization
 - Panchayats identify the priorities focusing on Human Development
 - Key sectors in the plan
 - Health
 - Education
 - Agriculture and land use plan
 - Basic infrastructure - Safe drinking water, roads, drainages, sanitation
 - Resource mobilization
- Ensured minimum participation of ten percent of village population in Gram Sabhas while finalizing the village plans

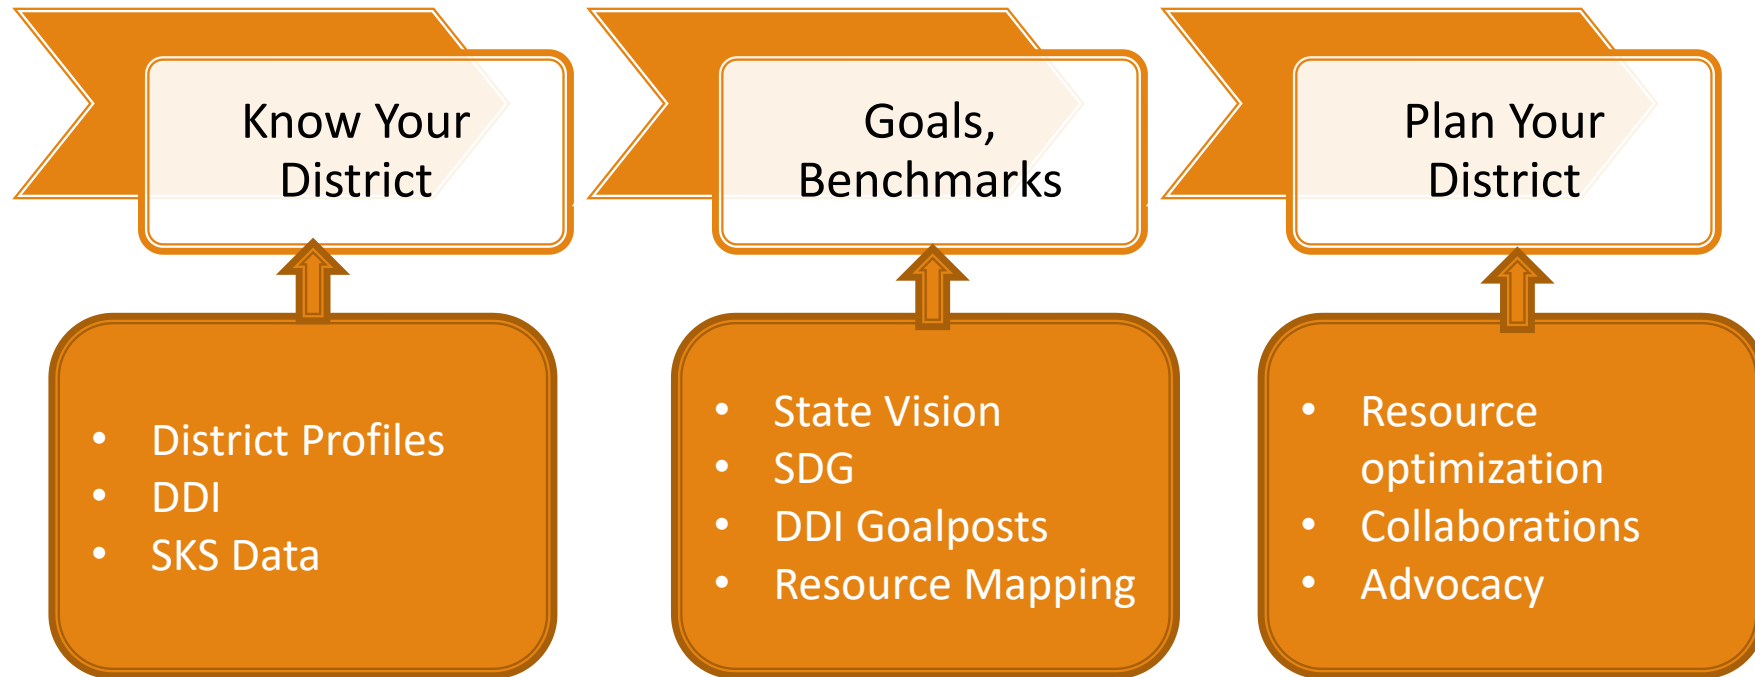

Know Your District – Plan Your District

Know Your District – Plan Your District

Objectives

- Planning as an important function of the field level functionary of the Planning Department,
- Looking beyond statistic gathering...
 - Mapping of all types of resources,
 - Usage of technology such as Geospatial Technology,
 - Convergence of data for Village, Mandal and District level planning,
 - Prepare shelf of projects,
- Effective use of Samagra Kutumba Survey (SKS) data,
- Monitoring and Evaluation of SDGs.

Strategy

Agriculture – % of Irrigated area

Agriculture - Irrigation Intensity

Agriculture – Cropping Intensity (in %)

Agriculture - % of MI tanks covered under Mission Kakatiya

Agriculture - Average Net sown area per cultivator (in ha)

Agriculture - Number of large livestock per 1000 population

Agriculture - Number of small ruminants per 1000 population

Green Cover - % of forests area

Urbanization - % of Urban Population

Employment - % of Non-farm employment

Employment - % of agriculture labour

Employment- TS-iPASS proposed employment per lakh population

Employment- TS-iPASS proposed employment per proposed industrial unit

Number of Industrial electric connections per lakh population

Number of commercial electric connections per lakh population

No. of proposed industries per lakh population under TS-iPASS

TS-iPASS proposed investment (in cr.) per Industrial unit

Households availing banking services

Education - Literacy rate

Education- Average number of teachers per Govt. school

Education- Student enrollment rate in 1-10th classes

Education- Student retention rate in Class 1-5

Education- No. of Junior colleges per 10,000 school students

Education- No. of students per Junior college

Public Health - No. of hospitals per 10 lakh population

Public Health- No. of doctors per 10 lakh population

Public Health- No. of hospital bed per 10 lakh population

Women Empowerment-SHG members as % of female population

Women Empowerment- Sex ratio of general population

Women Empowerment- Sex ratio in 0-6 years old population

Women Empowerment- Literacy gap between male and female

Women Empowerment- Sex ratio in non-farm employment

Women & Child welfare - % of women aged 20-24 years who got married before 18 years

Women & Child welfare - % of Institutional births

Women & Child welfare - % of Institutional births in public facility

Women & Child welfare - Mothers who received financial assistance under Janani Suraksha Yojana (JSY) for institutional deliveries (in %)

Women & Child welfare – Avg. out of pocket expenditure per delivery in public health facility (Rs.)

Women & Child welfare – % of women aged 15-49 years who are anaemic

Women & Child welfare – % of children aged 6-59 months who are anaemic (<11.0 g/dl)

Women & Child welfare – % of children under 5 years who are underweight (weight-for-age)

Women & Child welfare – % of children under 5 years who are stunted (height-for-age)

Women & Child welfare – % of children under 5 years who are wasted (weight-for-height)

Women & Child welfare – Number of Anganwadi workers per center

WASH – Water supply within household premises (%)

WASH- Households having latrine within the premises (in %)

Household Amenities- % of households with Electricity

Household Amenities- % of households having atleast one census asset

Roads - Road length per 100 sq. km. (in kms)

Roads - Blacktop and CC roads as % of total Panchayat roads

Overall district development Index

District Knowledge & Innovation Centre

A DECISION SUPPORT SYSTEM AT DISTRICT LEVEL

District Knowledge and Innovation Centres (DKICs)

- GoTS initiated DKICs on 30th May 2017 in all 31 districts.
- DKICs are expected to support district administration in following areas of focus:
 - planning and monitoring,
 - conducting district specific action research,
 - data analysis and evaluation of various programs which helps in decision making process.

Rationale for the initiative

- The newly formed State recently underwent a landmark administrative reorganization i.e., 10 to 31 districts (October 2016)
- This is a three-fold increase in administrative structure is a boon and resulted in:
 - Smaller administrative units in terms of geographic and population coverage
 - Administration is closer to the doorsteps of people
 - Real time monitoring of scheme implementation is more viable
 - Increased opportunity to identify and address district specific problems, poverty pockets etc.
 - Developing and implementing district specific and need based programs is more viable
 - Identifying and supporting good practices, evaluations etc., are easier
 - Improved chances for concentrated work on development sectors
 - The net distribution of un-tied funds/ grants increased substantially at district level

Aims of the DKIC

- Act as think tank / knowledge hub at district level
- DKIC will analyse and evaluate the program data and collected through surveys
- It will be a mechanism aimed to strengthen the capacities of individuals and organizations at district level
- It is aimed to conduct action research to identify issues and suggest solutions
- DKIC is a platform for sharing the ideas and views on good governance and district specific issues by involving various stakeholders
- DKICs are aimed to seek support from all the departments, State level institutions, local consultants placed by various national and international agencies to deliver the best.

Literacy Rates – A Quick Analysis

In-depth Analysis of **Literacy Rates** – A Case Study

Thank you
